I am an 82 year old graduate from Northeast Missouri State University(1940)Now Truman State University located in Kirksville, Missouri. My major was Economics and I remember well studying about Anti-Trust laws. I cannot believe what the current administration is trying to do in the case of Microsofts violation of the Anti-Trust laws. It is very apparent to most everyone I talk to that people realize what Microsoft is trying to do and that the Judge who determined that they are in violation of Anti-Trust laws of the United States was right. And the offer of Microsoft to furnish millions of refurbished computers loaded with Microsoft software is just a contiuance of their attempt to monopolize the computer software market. I have been using a computer for about six years, starting on an Apple II that my son gave me, but 6 months later purchased an Apple Peforma and a year ago moved up to an Apple iMac. I realize that 95 percent of computers use Microsoft programs but that is no reason to allow them monopolize the market in violation of the law. Sincerely, Bill Bondurant, 1709 South Lewis, Kirksville, MO 63501
